1 ORGANIZATION AND NATURE OF OPERATIONS

Indigo Exploration Inc. ("the Company") is in the business of the acquisition, exploration and evaluation of mineral properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is completed. The Company is listed for trading on the TSX Venture Exchange under the symbol "IXI". At June 30, 2015, the Company was in the exploration stage and had interests in properties located in Burkina Faso, West Africa. The Company's corporate head office is located at Suite 880 – 580 Hornby Street, Vancouver, British Columbia, Canada.

2 GOING CONCERN

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to meet its obligations and continue its operations for the next twelve months. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material. At June 30, 2015, the Company had not yet achieved profitable operations, had an accumulated deficit of \$6,608,461 since inception and expects to incur further losses in the development of its business, all of which indicate the existence of a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to develop the mineral properties and to meet its ongoing levels of corporate overhead and discharge its liabilities as they come due. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

3 BASIS OF PRESENTATION

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the annual audited consolidated financial statements for the year ended September 30, 2014, which have been prepared in accordance with IFRS as issued by the IASB.

The Company uses the same accounting policies and methods of computation as in the annual audited consolidated financial statements for the year ended September 30, 2014.

These financial statements were approved by the board of directors for issue on August 28, 2015.

4 ACCOUNTING STANDARDS

i) New standards and amendments effective for the first time from October 1, 2014

The following revised standards and amendments became effective for the Company on October 1, 2014. The new and amended standards did not have a significant impact on the condensed interim consolidated financial statements. The following is a brief summary of the principal new standards adopted by the Company:

IAS 32 – Financial instruments, Presentation. IAS 32 was amended to clarify the requirements for offsetting financial assets and liabilities. The amendments clarify that the right of offset must be available on the current date and cannot be contingent on a future date.

INDIGO EXPLORATION INC. (An Exploration Stage Company) NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS For the nine months ended June 30, 2015 and 2014 (Unaudited - Expressed in Canadian dollars)

IAS 36 - Impairment of Assets. IFRS 36 was amended by recoverable amount disclosures for nonfinancial assets.

IFRIC 21 – Levies. IFRIC 21 clarifies and provides guidance on when to recognize the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy.

ii) Accounting standards issued but not yet effective

At the date of approval of the condensed interim consolidated financial statements the following standards, which are applicable to the Company, were issued but not yet effective. The Company has not completed its assessment of the impact that the new and amended standard will have on its financial statements. The following is a brief summary of the principal new or amended standards.

IFRS 7 – Financial Instruments disclosures. The Standard was amended to require additional disclosures on transition from IAS 39 and IFRS 9, effective for annual periods beginning on or after January 1, 2015.

IFRS 9 – Financial Instruments: Classification and Measurement. IFRS 9 introduces new requirements for the classification and measurement of financial instruments and is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted.

5 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires management to use judgement in applying its accounting policies and estimates and assumptions about the future. Estimates and other judgements are continuously evaluated and are based on management's experience and other factors, including expectations about future events that are believed to be reasonable under the circumstances.

Judgements:

- (i) The assumption that the Company is a going concern and will continue in operation for the foreseeable future and at least one year. The factors considered by management are disclosed in Note 2.
- (ii) The assessment of indicators of impairment for the mineral properties and the related determination of the recoverable amount and write-down of the properties where applicable.

The Company has no critical accounting estimates.

6 MINERAL PROPERTIES (Schedule 1)

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to its mineral properties and, to the best of its knowledge, title to its properties are in good standing.

The recoverability of amounts shown as mineral properties is dependent upon the conversion of mineral resources to economically recoverable reserves, the Company's ability to obtain financing to develop the properties, and the ultimate realization of profits through future production or sale of the properties.

Pursuant to the Mining Code of Burkina Faso, an exploration permit holder is required to incur 270,000 West African CFA Francs (\$583) of exploration expenditures per square kilometre per year in order to maintain its permits in good standing. If such expenditures are not incurred, the Government of Burkina Faso may, at its discretion, cancel the permits after giving the permit holder sixty day notice to remedy any deficiency. At June 30, 2015, the Company has not incurred sufficient expenditures on its Lati, Loto and Tordo permits to comply with the Mining Code of Burkina Faso. Sufficient expenditures have been incurred on the Moule and Kodyel permits. The Company believes its Burkina Faso permits are in good standing.

During the nine months ended June 30, 2015, the Kodyel permit expired however the Company had submitted the documentation required to extend the permit prior to the civil unrest that broke out in Burkina Faso in October 2014. A transitional government has been established and will remain in place until the next election in 2015. As a result, the Company has not received the renewed permit from the new government. The Company believes it presently holds all necessary licenses and permits to carry on the activities which it is currently conducting, and that it is presently complying in all material respects with the terms of such licenses and permits. There can be no guarantee, however, that the Company will be able to obtain and maintain, at all times, all necessary licenses and permits required to continue the proposed exploration or to develop its properties into commercial production and to operate mining facilities thereon.

Kodyel Exploration Permit and Other Permits

Pursuant to the acquisition of Sanu Burkina Faso S.A.R.L. on June 30, 2010, the Company acquired gold mineral properties located in Burkina Faso, Africa. The permits acquired were the Kodyel Exploration Permit, the Tordo Exploration Permit, the Lati Exploration Permit and the Loto Exploration Permit. The Company has no significant commitments with respect to these permits other than compliance with the Mining Code of Burkina Faso.

Moule Gold Permit, Burkina Faso

On May 5, 2010, the Company entered into an option agreement to acquire a 100% interest, subject to a 1.5% net smelter return ("NSR") royalty, in the Moule Gold Permit, in western Burkina Faso. During the year ended September 30, 2013, the Company made the final option payment and was awaiting the 100% title transfer of the permit to the Company by the Burkina Faso government. The Company paid a total of US\$400,000 in cash and \$15,000 in shares to acquire the Moule Gold Permit. During the year ended September 30, 2014, the Company received the 100% title transfer of the permit to the Company by the Burkina Faso government.

The Company has the right to purchase the entire 1.5% NSR royalty for US\$1,800,000.
