The accompanying notes are an integral part of these condensed interim consolidated financial statements.

1 ORGANIZATION AND NATURE OF OPERATIONS

Indigo Exploration Inc. ("the Company") is in the business of the acquisition, exploration and evaluation of mineral properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is completed. The Company is listed for trading on the TSX Venture Exchange under the symbol "IXI". The Company is in the exploration stage and had interests in properties located in Burkina Faso, West Africa. The Company's corporate head office is located at Suite 880 – 580 Hornby Street, Vancouver, British Columbia, Canada.

2 GOING CONCERN

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to meet its obligations and continue its operations for the next twelve months. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material. At December 31, 2016, the Company had not yet achieved profitable operations, had an accumulated deficit of $7,057,739 (September 30, 2016 - $6,985,129) since inception, a working capital of $76,603 (September 30, 2016 - $110,653), and expects to incur further losses in the development of its business, all of which indicate the existence of a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern and, therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business. The Company's ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to develop the mineral properties and to meet its ongoing levels of corporate overhead and discharge its liabilities as they come due. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

3 BASIS OF PRESENTATION

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the annual audited consolidated financial statements for the year ended September 30, 2016, which have been prepared in accordance with IFRS as issued by the IASB.

The Company uses the same accounting policies and methods of computation as in the annual audited consolidated financial statements for the year ended September 30, 2016.

These financial statements were approved by the board of directors for issue on February 28, 2017.

4 ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

At the date of approval of the consolidated financial statements the following standards, which are applicable to the Company, were issued but not yet effective. The Company has not completed its assessment of the impact that the new and amended standard will have on its financial statements. The following is a brief summary of the principal new or amended standards.

<u>IFRS 9 - Financial Instruments</u>. In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments bringing together the classification and measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. IFRS 9 also amends some of the requirements of IFRS 7 Financial Instruments: Disclosures, including

added disclosures about investments in equity instruments measured at fair value in OCI, and guidance on financial liabilities and derecognition of financial instruments. The mandatory effective date of IFRS 9 would be annual periods beginning on or after January 1, 2018, with early adoption permitted.

IAS 7 - Statement of Cash Flows. In January 2016, IASB amended IAS 7, "Statement of Cash Flows", The amendments require that the following changes in liabilities arising from financing activities are disclosed (to the extent necessary): (i) changes from financing cash flows; (ii) changes arising from obtaining or losing control of subsidiaries or other businesses; (iii) the effect of changes in foreign exchange rates; (iv) changes in fair values; and (v) other changes. One way to fulfil the new disclosure requirement is to provide a reconciliation between the opening and closing balances in the statement of financial position for liabilities arising from financing activities. Finally, the amendments state that changes in liabilities arising from financing activities must be disclosed separately from changes in other assets and liabilities. This amendment will be mandatory for reporting periods beginning on or after January 1, 2017.

5 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

There have been no material revisions to the nature of judgments and amount of changes in estimates of amounts reported in the Company's September 30, 2016 annual consolidated financial statements.

6 MINERAL PROPERTIES (Schedule 1)

The Company holds a 100% interest in several properties in Burkina Faso, West Africa and has the right to purchase the entire 1.5% NSR royalty on the Moule Gold Permit for US$1,800,000. Refer to Schedule 1.

Pursuant to the Mining Code of Burkina Faso, an exploration permit holder is required to incur 270,000 West African CFA Francs ($583) of exploration expenditures per square kilometre per year in order to maintain its permits in good standing. If such expenditures are not incurred, the Government of Burkina Faso may, at its discretion, cancel the permits after giving the permit holder sixty day notice to remedy any deficiency. The Company has not incurred sufficient expenditures on its Moule, and Loto permits to comply with the Mining Code of Burkina Faso. The Company has not received any notice of cancellation from the Government of Burkina Faso and believes these permits are in good standing as at September 30, 2016.

The Kodyel, Tordo and Lati permits expired during the prior year ended September 30 2015. The Company submitted the documentation required to extend the permits and the Company has not yet received the renewed permits. The Company received a rejection letter during the year ended September 30, 2016 from its Tordo permit extension application. The Company recorded a write-down of $122,179. During the year ended September 30, 2016, the Company was in correspondence with Government officials on the Kodyel permits and therefore believes it will obtain extensions on the permit. There has been no correspondence with regard to the Lati permits and therefore during the year ended September 30, 2016 an impairment write down of $91,587 was recorded.

There can be no guarantee, that the Company will be able to obtain and maintain, at all times, all necessary licenses and permits required to continue the proposed exploration or to develop its properties into commercial production and to operate mining facilities thereon.
